Room Care R1-plus Pur-Eco

Toilet & urinal cleaner — concentrate

Citric acid**Daily use**pH $\approx$ 2**Colour-coded**

prevents limescalebottle & dispenser

Room Care R1-plus Pur-Eco is a concentrated, citric acid-based toilet and urinal cleaner for daily use. It's dosed through the dedicated Room Care Divermite dispenser, using the colour-coded R1 refill bottle so it can't be mixed up with the other Room Care products. Regular use helps prevent limescale build-up.

Before you start

- Acidic in use (pH $\approx$ 2) — wear gloves and eye protection when handling the concentrate.
- **Not suitable for acid-sensitive surfaces** — enamel, marble and grout. Wipe off any splashes on these surfaces immediately and rinse with water.
- Don't mix with bleach or other cleaning products.
- Only use with the Room Care Divermite dispenser and the matching R1 (red) bottle — never with another dosing system.
- For professional/trade use only.
- Full safety information is in the product's Safety Data Sheet — ask us if you need a copy.

How to use it

The Room Care dispenser doses the concentrate straight into the colour-coded bottle — no measuring needed.

•Daily cleaning

- 1 Take the empty R1 (red) bottle, remove the spray head, and fill with cold water to the marked line (750ml).
- 2 Place the bottle in the Room Care Divermite dispenser and press the button once to dose the concentrate ($\approx$ 2% solution).
- 3 Screw the spray head back on and shake gently to mix.
- 4 Apply to the toilet or urinal and clean with a brush or cloth.
- 5 Flush or rinse away.

•Tougher dirt & limescale

- 1 Fill the R1 bottle with cold water only to the 300ml line instead.
- 2 Dose as above ($\approx$ 5% solution) for extra strength.
- 3 Apply, leave briefly to work, then scrub and rinse away.

Product details

Format	Divermite Room Care concentrate, red colour-coded
Appearance	Clear, medium purple liquid
pH (neat)	≈ 2
pH (in use)	≈ 2

Surface compatibility: toilets and urinals. Not for acid-sensitive surfaces (enamel, marble, grout).
