

Diversey Suma · Heavy-duty degreaser

Suma Break-Up D3.5

Heavy-duty kitchen degreaser concentrate — 5L

pH ~6.6 Aluminium-safe 1:33-1:100

non-causticnot for painted surfacesdilution range

Suma Break-Up D3.5 is a heavy-duty degreaser for heavily soiled kitchen surfaces — floors, walls, equipment, cooker hoods and cooker tops. Unlike our other concentrates, it's non-caustic and safe to use on aluminium, so it's the one to reach for on softer metals and painted-adjacent equipment where the others aren't suitable. Dilute it to suit the job, from light foam-spray cleaning to full soak cleaning.

Before you start

- Near-neutral pH — gentler than our alkaline concentrates, but still wear gloves and eye protection when handling the neat concentrate.
- Safe for use on aluminium surfaces.
- Do not use on painted surfaces.
- For professional/trade use only.
- Store in the original closed container away from extremes of temperature.
- Full safety information is in the product's Safety Data Sheet — ask us if you need a copy.

How to use it

Dilution runs from 1:33 up to 1:100 depending on how soiled the surface is — use a stronger mix for heavy grease, weaker for routine cleaning.

●Foam or spray application

- 1 Dilute the concentrate into the foam equipment or trigger spray bottle (via the Jantex pelican pump for 25ml dosing, or by dilution ratio).
- 2 Apply liberally to all washable surfaces.
- 3 Leave to cling for at least **5 minutes** — don't let it dry out.
- 4 Rinse all surfaces thoroughly with clean water.

●Mop & bucket (floors)

- 1 Dilute at **1:33-1:100** in a bucket of hot water, depending on soiling.
- 2 Apply to the surface with a mop or sponge.
- 3 Allow the product to penetrate the soil.
- 4 Scrub with a brush or floor machine if needed.
- 5 Pick up the solution with a mop and rinse with clean water.

• Soak cleaning

- 1 Dilute at **1:33-1:100** in a bucket or sink of hot water.
- 2 Submerge the items and allow the product to penetrate the soil.
- 3 Scrub as necessary.
- 4 Rinse thoroughly with clean water.

Product details

Appearance	Clear yellow liquid
Odour	Bland
pH (concentrate)	≈ 6.6
pH (in use)	≈ 6.6
Yield	Approx. 500 spray bottles or 100 buckets per 5L

Surface compatibility: safe for use on aluminium and most kitchen surfaces. Do not use on painted surfaces.
