

Diversey TASKI · Concentrate with dosing pump

TASKI Sani 4in1 Plus

Washroom cleaner, descaler, disinfectant & deodoriser — 1L / 5L

4-in-1

one step, one product

Acid-based O.N.T.

pH < 2 neutralises odours

TASKI Sani 4in1 Plus is a concentrated, acid-based washroom cleaner that cleans, descales, disinfects and deodorises all acid-resistant hard surfaces in one step. It uses Diversey's O.N.T. technology to neutralise bad odours rather than mask them. Dosed with a pump into a spray bottle or bucket — no separate dosing system needed.

Before you start

- Acid-based (pH < 2) — wear gloves and eye protection when handling the concentrate.
- Don't mix with other products.
- For professional/trade use only.
- Store away from extremes of temperature.
- Full safety information is in the product's Safety Data Sheet — ask us if you need a copy.

How to use it

Standard dilution is 2.5% — a dosing pump for the bottle makes it easy to measure out.

• Spray bottle

- 1 Fill a 750ml spray bottle with water and add **≈19ml (2.5%)** of concentrate using the dosing pump.
- 2 Spray onto the surface and wipe with a cloth, brush or sponge.
- 3 Leave for 5 minutes contact time for disinfection.
- 4 Rinse and leave to air dry.

• Bucket

- 1 Fill a 5L bucket with water and add **≈125ml (2.5%)** of concentrate.
- 2 Apply the solution with a cloth, sponge or mop.
- 3 Brush briefly to distribute, and leave for 5 minutes contact time.
- 4 Use a sponge pad on stubborn soiling.

Product details

Format	Concentrate with dosing pump (1L / 5L)
Appearance	Clear, red liquid
pH (neat)	< 2
pH (in use)	< 2

Surface compatibility: all acid-resistant hard surfaces in washroom areas.
