Brasso Metal Polish

Tarnish remover for brass, copper, chrome & stainless steel

Ready to use **2 formats** **Abrasive**

no dilution

liquid or wadding test first, use sparingly

Brasso removes tarnish from brass, copper, chrome and stainless steel, restoring a bright shine. We stock it as a liquid or as pre-impregnated wadding — the liquid gives more control for larger or detailed items, while the wadding is quick and mess-free for smaller jobs. Both are mildly abrasive, so use sparingly and don't over-polish.

Before you start

- Flammable liquid and vapour — keep away from heat, sparks and open flames.
- Use in a well-ventilated area; avoid breathing in vapours or dust.
- Wear gloves and eye protection.
- Test on an inconspicuous area first.
- Full safety information is in the product's Safety Data Sheet — ask us if you need a copy.

How to use it

Ready to use — no dilution for either format.

•Liquid

- 1 Apply a small amount to a soft cloth.
- 2 Rub onto the metal surface using firm, circular motions.
- 3 Leave to dry to a haze, then buff off with a clean, dry cloth to a shine.

•Wadding

- 1 Remove a piece of wadding from the tin.
- 2 Polish the surface evenly, using firm pressure.
- 3 Buff off with a clean, dry cloth to a shine.

Product details

Formats

Liquid (175ml) · Wadding

Type

Mildly abrasive metal polish

Suitable for: brass, copper, chrome and stainless steel. Will wear metal over time with repeated use — use sparingly.
