Chemical Toilet Flush

For portable & chemical toilet waste tanks

Breaks down waste**Controls odours****Lasts days**

eases tank emptying bactericidal action between doses

Chemical Toilet Flush is an additive for portable and chemical toilet waste tanks — used in event facilities, site cabins, and similar setups. It helps break down waste for easier emptying and controls odours between servicing.

Before you start

- Wear gloves when handling.
- Keep out of reach of children.
- Full safety information is in the product's Safety Data Sheet — ask us if you need a copy.

How to use it

Dose into the waste tank, then top up with water to cover any solid matter.

•Dosing the waste tank

- 1 Add **100ml of fluid per 10L** of waste tank capacity.
- 2 Add water to fully cover any solid matter in the tank.
- 3 One dose typically lasts several days, depending on usage — redose as needed.
- 4 More or less solution may be needed depending on frequency of use.
