Isopropyl Alcohol 99.9%

Fast-drying cleaning & disinfecting solvent

Highly flammable

Fast evaporating

Dilute to 70%

keep away from heat/flame residue-free finish

for surface disinfection

Isopropyl Alcohol 99.9% (IPA) is a high-purity solvent used for cleaning and disinfecting a wide range of surfaces, electronics and equipment. It evaporates quickly and leaves no residue, making it ideal where a fast-drying, streak-free finish matters. Used neat for general cleaning and degreasing, or diluted to around 70% for surface disinfection — 100% alcohol actually evaporates too quickly to give bacteria and viruses enough contact time to be killed effectively.

Before you start

- **Highly flammable.** Keep away from heat, sparks, open flames and hot surfaces — no smoking nearby.
- Use in a well-ventilated area.
- Not suitable for all plastics — test on an inconspicuous area first.
- Store in a tightly sealed container, in a cool, dry place away from ignition sources.
- Full safety information is in the product's Safety Data Sheet — ask us if you need a copy.

How to use it

Use neat for degreasing and electronics; dilute for surface disinfection.

• General cleaning & degreasing — neat

- 1 Apply directly with a cloth or swab, or use a spray bottle.
- 2 Wipe the surface. It will evaporate quickly, leaving no residue.

• Surface disinfection — diluted

- 1 Dilute to **around 70%** — roughly 7 parts IPA to 3 parts water.
- 2 Apply to the surface with a spray bottle or cloth, ensuring it's thoroughly wetted.
- 3 Allow to air dry.

Product details

Formats 1L / 5L

Purity 99.9%

Suitable for: most metal, glass and plastic surfaces, and electronics. Test unfamiliar plastics first.
