

Concentrated sulphuric acid · 1L

Sulphuric Acid Drain Cleaner

Outdoor drain & toilet unblocker — trade use only

Highly corrosive **Acid to water** **Outdoor drains only**

severe burns risk never reverse the order not for septic tanks

Sulphuric Acid Drain Cleaner is a highly concentrated acid formulation (typically 90%+ sulphuric acid) for rapidly clearing stubborn blockages in outdoor drains, pipes and toilets. It's a serious hazard if handled carelessly — read this guide fully before use, and only use it if you're trained and equipped to do so safely.

Before you start — this one matters

- **Highly corrosive.** Causes severe skin burns and serious eye damage. Wear chemical-resistant gloves, eye/face protection and protective clothing.
- **Trade and professional use only** — this product is regulated and restricted to trade users.
- Outdoor drains, pipes and toilets only. **Not suitable for septic tanks.**
- Only use with plastic plumbing — it can damage chrome, stainless steel and galvanised pipework.
- If diluting, always add the acid to water, never water to acid — reversing this can cause violent spitting and splashing.
- Clear the area around the drain and cover any nearby metal fittings before use.
- Never mix with other chemicals, especially bleach — this can release toxic gas.
- Work in a well-ventilated area.
- Full safety information is in the product's Safety Data Sheet — ask us if you need a copy.

How to use it

Used neat, in small amounts, poured slowly and carefully.

● Clearing a blocked outdoor drain, pipe or toilet

- 1 Put on full PPE — chemical-resistant gloves, eye/face protection and protective clothing.
- 2 Ensure the area is well ventilated and clear of people and pets.
- 3 Pour a small amount of the product slowly and directly into the blocked drain, pipe or toilet — do not rush this step.
- 4 Leave for 10–15 minutes to dissolve the blockage.
- 5 Flush thoroughly with plenty of cold water.
- 6 Repeat only if necessary, and never exceed the amount needed to clear the blockage.

Product details

Format

1L

Composition	Concentrated sulphuric acid with corrosion inhibitor
Classification	Corrosive — regulated explosives precursor product

Suitable for: outdoor drains, pipes and toilets with plastic plumbing. Not for septic tanks or metal pipework.
